

Jeremy Harris

Healthcare Data Analyst | Data Operations Analyst

Kansas City, MO | jeremy_harris.csv@proton.me | (720) 600-9433 | [linkedin.com/in/jeremy-harris-data](https://www.linkedin.com/in/jeremy-harris-data) | github.com/hanjre

Data Analyst with a healthcare operations background and hands-on experience building SQL-based analytics pipelines, validating large CMS datasets and developing Tableau and Python reporting tools. Skilled in data quality checks, root cause analysis, reporting accuracy, and translating raw healthcare data into structured, decision-support outputs. Brings experience supporting billing, utilization analysis, operational reporting, and HIPAA-compliant data handling in high-volume healthcare environments.

Skills & Tools

- Data Analytics & Reporting: SQL (PostgreSQL), Tableau, Power BI, Python, Excel, Data Cleaning, Data Validation, Dashboard

Development, KPI Reporting, Root Cause Analysis

- Tools: GitHub, Docker, VS Code, Jupyter, Google Sheets, Looker Studio

- Healthcare & Operations: Healthcare Data Accuracy, Revenue Cycle Support, Utilization Analysis, Billing Data Validation, HIPAA Compliance, Workflow Improvement

- Professional Strengths: Attention to Detail, Problem-Solving, Documentation, Reporting Support, Cross-Functional Collaboration

Projects

Medicare Utilization Analytics Pipeline & Dashboard | SQL, Tableau, Power-BI, Excel View Project

- Built an end-to-end SQL pipeline using CMS datasets to create structured utilization tables for analysis and reporting.
- Performed data validation checks including nulls, duplicates, consistency, and referential integrity to improve data quality.
- Developed a Tableau and Power BI dashboard to analyze utilization trends, cost patterns, and service distribution for healthcare reporting.

Emergency Department Throughput Simulation | Python, SQL View Project

- Developed a Python-based simulation model using CMS and synthetic datasets to analyze patient flow and throughput constraints.
- Modeled operational scenarios to evaluate bottlenecks and identify workflow improvement opportunities.
- Generated structured analytical outputs to support reporting and operational decision-making.

Analytics Portfolio & Workflow System | GitHub, Docker View Project

- Designed and deployed a portfolio site showcasing SQL, Tableau, and Python analytics projects.
- Implemented version-controlled workflows to support reproducible analysis and structured documentation.
- Organized project assets and reporting outputs to present technical work clearly to employers.

Professional Experience

Patient Access Representative | Truman Medical Center / University Health 2018 – Present

- Verified high-volume patient demographic and insurance data to support billing accuracy, claims processing, and downstream reporting reliability.
- Identified and resolved data discrepancies at intake, reducing errors affecting billing, claims, and operational workflows.
- Maintained data integrity in a fast-paced healthcare environment requiring precision, consistency, and HIPAA compliance.
- Collaborated with clinical, administrative, and insurance teams to ensure accurate and compliant handling of patient information.

Ophthalmic Assistant | Children's Mercy Hospital 2017 - 2019

- Supported clinical documentation and patient data workflows to maintain accuracy and completeness.
- Improved billing accuracy by designing a more structured chart breakdown workflow.
- Assisted with operational processes tied to documentation quality and patient flow.

Radiology Imaging Support Specialist | Orlando Health 2007 – 2010

- Managed imaging records and ensured accurate, HIPAA-compliant handling of patient information.
- Coordinated data exchange across departments to support operational and clinical workflows.
- Maintained organized documentation and timely processing of imaging-related requests.

Education & Certifications

Bachelor of Science in Criminal Justice University of Central Missouri

Data Analyst Career Training Northwest Missouri State University
Additional Certifications: CompTIA Data+
